~~Introduction To The Ls~~

The Basics The ls, or listing, command

will list all of the 'visible' files in a

directory by default e.g. [22:29]

centos:~:\$ ls setup.sh test_dir

workspace Adding the -l flag will

provide a long vertical listing similar to

a typical GUI file explorer, showing the

user and group the files belong to, the

permissions for...

the current directory's files and directories. The ip command without any arguments will print a message that shows you how to use the ip command. Try running the ls command with no arguments to list the files and directories in your current directory (there may be none): ls.

~~An Introduction to the Linux Terminal | DigitalOcean~~

At first, we entered the command ls which stands for list. By default this command will print the content of the current directory. Secondly, we have added an argument to ls by typing a space and -l. This argument is changing the output format of ls and stands for "long listing format".

Particle Solution Overview. This class provides an introduction to using the topology optimization and shape computation code, LS-TaSC, for design. It covers both the theoretical concepts and practical aspects of topology optimization. The course includes workshop sessions in which the theoretical topics are applied. The LS-TaSC graphical user interface is used to teach input preparation and post-processing.
