Networking in the Internet Age by Dennis, Alan - Amazon.ae

The origins of the Internet date back to the development of packet switching and research commissioned by the United States Department of Defense in the 1960s to enable time-sharing of computers. The primary precursor network, the ARPANET, initially served as a backbone for interconnection of regional academic and military networks in the 1970s. The funding of the National Science Foundation Network as a new backbone in the 1980s, as well as private funding for other commercial extensions, led t

Internet - Wikipedia

According to government statistics back in 2007, 55% of children aged 12-15 who used the Internet at home had created a page or profile on a social networking site, which equates to two in five of all this age group in the UK. Indeed 55% of this group accessed social networking sites at home at least once a week.
