for OpenOffice.org and is firmly integrated in the Office package. As the name suggests, OpenOffice.org Basic is a programming language from the Basic family.

OpenOffice.org BASIC Guide

Apache OpenOffice Basic is an interpreter language. Unlike C++ or Delphi, the Apache OpenOffice Basic compiler does not create executable or self-extracting files that are capable of running automatically. Instead, you execute an Apache OpenOffice Basic program inside Apache OpenOffice. The code is first checked for obvious errors and then executed line by line.

Apache OpenOffice Wiki

OpenOffice offers a language independent application programming interface (API) which allows to program the office in different programming languages (e.g. C++, Java, Python, CLI, OpenOffice Basic, JavaScript, OLE).

The Apache OpenOffice API Project

Programmers of other languages – such as Java, C++, or Delphi – should also find it easy to familiarize themselves with Apache OpenOffice Basic. Apache OpenOffice Basic is a fully-developed procedural programming language and no longer requires rudimentary control structures, such as GoTo and GoSub.

*The Language of Apache OpenOffice
BASIC - Apache ...*

Basic is a scripting language directly integrated in OpenOffice.org.
