Performance tuning in Oracle databases  
includes optimizing SQL statements and query  
execution plans so that the requests can be  
completed more efficiently. The organization  
of a database the SQL statements used to

resources needed to respond to queries when  
an application communicates with the  
database.

~~Prentice Hall 2000~~  
SQL tuning is the iterative process of improving SQL statement performance to meet specific, measurable, and achievable goals. SQL tuning implies fixing problems in deployed applications. In contrast, application design sets the security and performance goals before deploying an application. 1.2 Purpose of SQL Tuning
