The fully revised and updated version of the leading textbook on real estate investment, emphasising real estate cycles and the availability and flow of global capital Real Estate Investment remains the most influential textbook on the subject, used in top-tier colleges and universities worldwide. Its unique, practical perspective on international real estate investment focusses on real-world techniques which measure, benchmark, forecast and manage property investments as an asset class. The text examines global property markets and real estate cycles, outlines market fundamentals and explains asset pricing and portfolio theory in the context of real estate. In the years since the text's first publication, conditions in global real estate markets have changed considerably following the financial crisis of 2008-2009. Real estate asset prices have increased past pre-crisis levels, signalling a general market recovery. Previously scarce debt and equity capital is now abundant, while many institutions once averse to acquiring property are re-entering the markets. The latest edition is extensively revised and updated to address current market trends and practices as well as reflect feedback from instructors and students. It features new content on real estate development, improved practical examples, expanded case studies and more. This seminal textbook: Emphasises practical solutions to real investing problems rather than complex theory Offers substantial new and revised content throughout the text Covers topics such as valuation, leasing, mortgages, real estate funds, underwriting and private and public equity real estate Features up-to-date sections on performance measurement, real estate debt markets and building and managing real estate portfolios Includes access to a re-designed companion website containing numerous problems and solutions, presentation slides and additional instructor and student resources Written by internationally-recognised experts in capital management and institutional property investing strategies, Real Estate Investment, Second Edition: Strategies, Structures, Decisions is an indispensable textbook for instructors and students of real estate fund management, investment management and investment banking, as well as a valuable reference text for analysts, researchers, investment managers, investment bankers and asset managers.

Developments in the sophistication of global real estate markets mean that global real estate investment is now being executed professionally. Thanks to academic enquiry, professional analysis and entrepreneurial activity, backed by the globalisation of all investment activity, there is now an available body of material which forms the basis of this scholarly but practical summary of the new state of this art. The measurement, benchmarking, forecasting and quantitative management techniques applied to property investments are now compatible with those used in other asset classes, and advances in property research have at last put the ongoing debate about the role of real estate onto a footing of solid evidence. The truly global scope and authorship of this book is unique, and both authors here are singularly well qualified to summarise the impact and likely future of global innovations in property research and fund management. Between them, they have experienced three real estate crashes, and have observed at first hand the creation of the real estate debt and equity instruments that led to the global crisis of 2008-9. Global Property Investment: strategies, structure, decisions offers a unique perspective of the international real estate investment industry with: a close focus on solutions to real life investment problems no excessive theoretical padding a target of both students and professionals highly qualified dual-nationality authorship With many cases, problems and solutions presented throughout the book, and a companion website used for deeper analysis and slides presentations (see below), this is a key text for higher-level real estate students on BSc, MSc, MPhil and MBA courses worldwide as well as for practising property professionals worldwide in fund management, investment and asset management, banking and real estate advisory firms.
