Robert Jervis Perception and Misperception in ...

Robert Jervis is a professor of international politics at Columbia University. He studies the intersection of psychology and international relations. His work challenges popular notions about nuclear deterrence by noting the complexities that perception and misperception introduce to deterrence and foreign relations as a whole.

Perception in Politics - BPR Interviews: Robert Jervis ...

In Perception and Misperception in International Politics, UCLA political scientists Robert Jervis seeks to demonstrate that decision-makers' perceptions of the world and of other actors diverge from reality in detectable patterns that may be understood. Jervis analyzes the methods by which decision-makers process information and form, maintain, and change their beliefs about international relations and other actors.

Jervis, Perception and Misperception in International ...

Jervis' classic book looks at the role of misperception in international politics, and assesses the extent to which it can be used to explain decisions my elites. Specifically it focuses on the role of decision-making in circumstances of limited information, as well as the role that cognitive biases play in the interpretation of such information.

Perception and Misperception in International Politics ...

Perception and Misperception in International Politics: New Edition examines and tests, through historical example and precedent, the application of cognitive psychology on political decision making. Dr Robert Jervis describes the process of perception , for example how decision makers learn from history, and then explores common forms of misperception, such as overestimating one's influence on other decision makers.

Book Review | Perception and Misperception in ...

One of the insights from the new preface to Perception and Misperception that poses the greatest challenge to current research on international politics is Jervis's critique of Bayesian logic, which is derived from a theory of probability attributed to the Reverend Thomas Bayes and published in 1763, two years after his death.

Roundtable 10-4 on Perception and Misperception in ...

Jervis applies his theory to predict whether the US and USSR are likely to engage in a nuclear war. Misperceptions could increase the probability of conflict (US vs. USSR), but it is a game of chicken: nuclear war will not happen if both sides are minimally rational and control their behavior, but will be more likely if both sides conclude war is inevitable
