A Checkbook IRA, also known as a Checkbook Control IRA, is an Individual Retirement Arrangement that allows the investor to write checks using the IRA's cash. Investors may choose a Checkbook IRA

because it's an account structure that shifts direct access to IRA cash and assets from the IRA provider to the account holder.

term used when a self-directed IRA owner has complete signing authority over an account that gives access to his/her retirement funds. This strategy is achieved through the establishment of

a Self-Directed
IRA LLC. Since
the LLC
established is a
business entity,
it can establish
